# OneSuit • Whatomate Platform

**USER / VENDOR / COMPANY / CLIENT – ADMIN ACCESS AUDIT**

Specification Source: **wa.onesuit.in > Admin Access** • Generated: October 28, 2026

**Role: Tenant Administrator (admin@login.com)**

Tech Stack: React 18 + TypeScript • Go / PostgreSQL
Audit Status: **Complete Architecture Gap Analysis**

| 29 | 9 | 14 | 6 | 55% |
|---|---|---|---|---|
| TOTAL FEATURES | ✅ AVAILABLE (31%) | 🟡 PARTIAL (48%) | ❌ MISSING (21%) | READINESS SCORE |

## 1 Dashboard Overview Functions

| FEATURE | STATUS | CURRENT IMPLEMENTATION | GAP / MISSING REQUIREMENT |
|---|---|---|---|
| **WhatsApp API Status** | 🟡 PARTIAL | Static telemetry pill in `TopStatusBar.tsx`; live WABA status visible under `AccountsView.tsx`. | No dedicated health indicator or API heartbeat card directly on the main `DashboardView.tsx`. |
| **Quality Rating** | 🟡 PARTIAL | Shown in top header pill (`High`), in Meta Insights view, and on templates in `TemplatesView.tsx`. | Missing as a prominent primary KPI metric card on the dashboard. |
| **Message Limit Per Day** | 🟡 PARTIAL | Top status bar shows tier and quota (`Tier 3 (100K/24h)`). Meta Insights displays limit tiers. | Lacks a daily message consumption gauge / progress bar on the dashboard. |
| **Wallet Balance & Recharge** | ❌ MISSING | No wallet schema, ledger table, or recharge mechanism in backend or frontend. | Needs prepaid balance ledger table, dashboard credit card, and "Recharge Wallet" payment dialog. |
| **Training Videos** | ❌ MISSING | No video tutorials or onboarding guides exist in the client panel. | Needs an embedded tutorial video carousel or video documentation drawer on the dashboard. |
| **Raise Support Ticket** | ✅ AVAILABLE | Dedicated **"Support"** in upper navbar linking to `SupportView.tsx`. Supports attachments, threaded replies, and status resolution. | Fully working. (Can optionally add a 1-click shortcut inside Dashboard Quick Actions). |
| **Analytics** | ✅ AVAILABLE | Customizable dashboard widgets (Messages, Contacts, Bot, Broadcasts) + dedicated deep-dive views (`AgentAnalytics`, `MetaInsights`). | Fully working. |

## 2 Live Chats

| FEATURE | STATUS | CURRENT IMPLEMENTATION | GAP / MISSING REQUIREMENT |
|---|---|---|---|
| **All Chats** | ✅ AVAILABLE | Full WhatsApp inbox in `ChatView.tsx`: real-time streaming, sent/delivered/read receipts, search, notes, and tags. | Fully working. |
| **Old History** | 🟡 PARTIAL | Full conversation history for selected contact is loaded via `messagesService.list` chronologically. | Lacks a dedicated **"Old History / Archived"** tab in the inbox filter rail to separate active from resolved chats. |
| **AI Agent** | FUTURE FUNCTION | AI Contexts exist under Chatbot (`AIContextsView.tsx`). Live Chat is currently 100% human agent. | Needs an AI Co-pilot / Auto-suggest toggle drawer inside `ChatView.tsx`. |

## 3 Contacts Management

| FEATURE | STATUS | CURRENT IMPLEMENTATION | GAP / MISSING REQUIREMENT |
| --- | --- | --- | --- |
| **Export Contacts** | ✅ AVAILABLE | "Export CSV" button in `ContactsView.tsx` triggers backend CSV streaming with phone numbers, names, and tags. | Fully working. |
| **Import Contacts** | 🟡 PARTIAL | Backend endpoint `POST /api/import` and service method `dataService.importData` exist with duplicate handling. | `ContactsView.tsx` is missing the frontend "Import CSV" button and modal upload dialog. |
| **Create Groups** | 🟡 PARTIAL | Segmentation is handled via **Tags** ( `TagsView.tsx` ) and contact tags. Campaigns filter audience by tags. | No dedicated `ContactGroup` entity or explicit "Create Group / Audience List" manager UI. |

## 4 WhatsApp Campaigns

| FEATURE | STATUS | CURRENT IMPLEMENTATION | GAP / MISSING REQUIREMENT |
|---|---|---|---|
| **Launch WhatsApp Campaign** | ✅ AVAILABLE | Dedicated module in `CampaignsView.tsx` and `CampaignDetailView.tsx`: template selection, audience filtering by tag, batch recipient import, broadcast launch, pause/resume, and deliverability tracking. | Fully working and operational. |

## 5 Build Chatbot Suite

| FEATURE | STATUS | CURRENT IMPLEMENTATION | GAP / MISSING REQUIREMENT |
|---|---|---|---|
| **Two Options to Create Bot** | 🟡 PARTIAL | Keywords view at `/chatbot/keywords`; Flow builder at `/chatbot/flows`. | The entry page `ChatbotView.tsx` lacks a clear 2-card prompt: **"1. List Bot (Keywords)"** vs **"2. Flow Bot (Visual Flow Builder)"**. |
| **List Bot (Keywords)** | ✅ AVAILABLE | `KeywordsView.tsx`: add new bot rules, trigger keywords (comma-separated), match types (`exact`, `contains`, `starts_with`, `regex`), and priorities. | Fully working. |
| **Flow Bot (Flows & Buttons)** | ✅ AVAILABLE | `ChatbotFlowBuilderView.tsx`: visual drag & drop canvas, edit flows, configure 8 button types (Quick Reply, URL, Call, WhatsApp Call, Callback, Promo Code, etc.). | Fully working. |
| **Transfer: List Bot → Flow Bot** | 🟡 PARTIAL | Backend `models.KeywordRule` supports `response_type: 'flow'` and executes graph flows. | `KeywordsView.tsx` UI dropdown only lists `text` and `transfer`; missing a **"Flow"** option with a flow selector dropdown. |
| **Import / Export Bots in JSON** | ❌ MISSING | No JSON export or import buttons exist in `ChatbotFlowsView.tsx` or `ChatbotFlowBuilderView.tsx`. | **Key requirement:** Needs "Export JSON" button to download bot schema and "Import JSON" modal so users can import AI-generated bots. |

## 6 Facebook & Meta Catalogue

| FEATURE | STATUS | CURRENT IMPLEMENTATION | GAP / MISSING REQUIREMENT |
|---|---|---|---|
| **Connect Facebook Page / WABA** | 🟡 PARTIAL | Connects Meta WhatsApp Business Accounts (WABA) with Meta Catalog ID and syncs products via Meta Commerce Graph API (`CatalogsView.tsx`). | Lacks direct Facebook Page OAuth connection UI (distinct from WABA account connection). |
| **Display Catalog on WhatsApp Profile** | 🟡 PARTIAL | Products, SKUs, images, and prices are fully synced with Meta Commerce Manager. | Missing the direct toggle button calling Meta API `whatsapp_commerce_settings: is_catalog_visible`. |

## 7 Receive Payment on WhatsApp

| FEATURE | STATUS | CURRENT IMPLEMENTATION | GAP / MISSING REQUIREMENT |
|---|---|---|---|
| **Receive Payment on WhatsApp** | ❌ MISSING | No payment gateway (Razorpay, Stripe, PayU, or WhatsApp Pay Native) exists in the codebase. | Complete new module required: payment gateway credentials, payment link generation, in-chat checkout buttons, webhook receipt verification. |

## 8 Manage Section

| FEATURE | STATUS | CURRENT IMPLEMENTATION | GAP / MISSING REQUIREMENT |
|---|---|---|---|
| **Templates** | ✅ AVAILABLE | Dedicated `/templates` module: live Meta sync, category filters, quality ratings, variable placeholders, media headers, and buttons. | Fully working. |
| **Opt-in Management** | 🟡 PARTIAL | Backend tracks `marketing_opt_out` per contact and automatically honors "STOP" keywords. | No dedicated Opt-in Management UI for generating website opt-in widgets, QR codes, or viewing consent audit logs. |
| **Live Chat Settings** | 🟡 PARTIAL | Canned responses view exists ( `CannedResponsesView.tsx` ) with demo data. Notifications/ringtone settings exist in `SettingsView.tsx` . | Missing dedicated Live Chat settings for: business operating hours, agent auto-assignment rules, inactivity timeouts, and offline auto-replies. |
| **Attributes / Tags** | 🟡 PARTIAL | **Tags:** Backend API `/api/tags` is complete with Redis cache; frontend `TagsView.tsx` uses local state. **Attributes:** Contact model has `Metadata` JSONB, but no custom attribute definition builder. | Connect `TagsView.tsx` to live `/api/tags` and build a Custom Attributes manager (e.g., `customer_id`, `city`, `plan`). |
| **Teams** | ✅ AVAILABLE | `TeamsView.tsx` : create/edit teams, assign strategies (Round Robin, Load Balanced, Manual), manage team members and leads. | Fully working. |
| **Billing & Usage** | 🟡 PARTIAL | Super Admin has `SubscriptionsView.tsx` ; backend has Meta pricing analytics. | No client-facing `/settings/billing` page where tenant admin can view their active plan, message quota consumption, invoices, or upgrade plans. |

## • Implementation & Feature Gap Roadmap

### Phase 1: High-Impact Quick Wins (Immediate Parity)

- **Chatbot JSON Import / Export:** Add "Export to JSON" and "Import from JSON" buttons in flow builder and flows view for AI-generated bots.
- **List Bot → Flow Bot Linking:** Add `Flow` as a response type option in `KeywordsView.tsx` with a flow selector dropdown.
- **Contacts Import Dialog:** Connect `dataService.importData` to a clean CSV upload dialog in `ContactsView.tsx`.
- **Live Chat "Old History" Filter Tab:** Add an "Archived / Resolved" tab in `ChatView.tsx`.
- **Tags View Backend Connection:** Connect `TagsView.tsx` to the existing live `/api/tags` backend service.

### Phase 2: Core Platform Enhancements

- **Dashboard Health & Quota Card:** Place live Meta API status, Quality Rating badge, and 24h message tier progress directly on `DashboardView.tsx`.
- **Tenant Billing & Usage View:** Create client-facing `/settings/billing` view showing active plan, quota consumed, and renewal date.
- **Unified Chatbot Hub:** Provide a clear 2-card landing inside `/chatbot` for "1. List Bot" vs "2. Flow Bot".
- **Display Catalog on Profile Toggle:** Add the toggle calling Meta Commerce settings API in `CatalogsView.tsx`.

### Phase 3: Major Subsystems

- **Receive Payment on WhatsApp:** Integrate Razorpay / Stripe / WhatsApp Pay for payment links and in-chat checkout.
- **Prepaid Wallet & Recharge:** Implement wallet ledger tables, balance tracking, and message credit deduction.
- **Opt-in Management Hub:** Create an opt-in dashboard for QR codes, website widgets, and consent logs.
- **Live Chat AI Agent / Co-pilot:** Build AI assistant auto-suggest inside `ChatView.tsx`.
